

CONCRETE PROTECTION ACADEMY

INDUSTRY EXPERT

Alex Negredo, M.Sc
Technical Sales Representative,
Concrete Protection
Titan Environmental

Alex Negredo is a highly skilled civil engineer specializing in concrete technology and protection.

Holding a master's degree in civil engineering with a specialization in the durability of concrete, Alex brings a deep understanding of the complexities associated with concrete structures; coupled with expertise in concrete corrosion, abrasion, chemical degradation, and microbial-induced corrosion (MIC).

He diligently applies his knowledge and nearly 10 years of industry experience to deliver sound technical support aimed at maintaining and enhancing the structural integrity of wastewater infrastructure, with a special focus on material best practices and risk management solutions for concrete wastewater tunnels.

As a technical specialist with Titan Environmental's Concrete Protection Division, Alex leverages his education and background in construction estimating, supervision, and consulting to provide expert guidance on concrete protection and repair, making him a valuable technical resource for wastewater industry professionals across the country.
