

CONCRETE PROTECTION ACADEMY

INDUSTRY EXPERT

Trair Lewinske
Project Manager, Concrete
Protection Liner
Titan Environmental

Trair Lewinske is the Project Manager for the Concrete Protection Liner Division at Titan Environmental. With 29 years of hands-on experience in HDPE welding applications and concrete protection liner systems, he brings deep technical expertise to complex environmental projects.

Over the past two decades, he has led large-scale industrial and infrastructure projects, with a strong focus on field welding, quality assurance, and quality control.

Drawing directly from his extensive background in the field, Trair helps industry professionals bridge the gap between theory and application. He provides practical insights into HDPE welding procedures, strict QA/QC standards, and proven best practices to ensure long-term liner performance in demanding environments.
